

# User Instructions

[www.RacingTraX.com](http://www.RacingTraX.com)

- 1) Connect TraX into vehicle's 12v power system. Hard wire race unit using 5 amp fuse. Use lighter plug to power TraX used in chase vehicles. Your TraX unit will produce its own wifi signal (No you can't surf the web, signal is a means of connecting a mobile device to TraX).
- 2) Using a smart phone, laptop, tablet or ipad, look for your TraX wifi signals. RacingTraX wifi will show as: RacingTraX followed by a 6 digit number. ROMTraX Chase unit's wifi will show as race # + Chase 1, 2, 3 or 4. Once you find your wifi, connect to it.
- 3) Once connected, go to any web browser like Safari, Internet Explorer or Chrome. In the search bar just type: **10.10.10.10** and hit enter. DO NOT type [www.10.10.10.10.com](http://www.10.10.10.10.com)

No app is required. By typing 10.10.10.10 you will be taken to the messaging interface. Click black menu box at top left corner of screen. See options to send texts or emails, post to social media or add contacts. Create an 8-digit password (recommended) by clicking settings, wi-fi security, security type and then choose either WPA or WPA2. We suggest PW: 11111111

There will be no audible noise when receiving so watch for incoming messages. Messages and contacts will be stored in cookies on mobile device that's being used at the time.

## Trouble Shooting

- 1) Only one device can be connected to TraX at a time.
- 2) Make sure private browsing is turned off and that your phone can accept cookies.
- 3) Have the most up to date software download onto your mobile device.
- 4) Ensure TraX has power and you've connected to it's wifi signal.
- 5) Cycle power on mobile device and TraX unit and try again.

## Messaging

To send a text go to menu, send text, and type in 10-digit phone number. Save contact.  
To Email go to menu, send email, insert email address and write message. Press send!

**To message between TraX units, send email to: "assigned name"@textany.com**

**Example: If my race number was 00, my assigned name might be 00race@textany.com**

When texting a cell phone, ALL TraX units have the same (720) 548-2115 number. If multiple TraX units are messaging the same *cell phone*, the cell user will be replying to the last TraX message that was recieved. To message a specific TraX unit, **CELL USER** must first type @ in message body, a space and then the message.

*Example: "@00race I recieved your message", "@00chase1 Do you have spare parts?"  
"@00chase2 Head back to Pit and help with repair"*

**Always test your individual Chase units a week before each race!**
