

BEST IN THE DESERT RACING ASSOCIATION

BEST IN THE DESERT RACER PIT CREW INFORMATION:

Mandatory Fueling and Fire Extinguisher rules:

Please Read the Rule Book Car/Truck Page 18-19 – SGPT9, 12, 13

PRESSURE, FUEL TOWERS and DUMP CAN rules Car/Truck/UTV:

1. Fire suits for the crew around fueling
2. External discriminator valve on fuel cell vent
3. Must not have fuel leaking around connection to vehicle or the vent and must have catch can under vent
4. Dump Cans - 1- 20lb Fire extinguisher manned by a dedicated person
Pressure and Fuel Towers - 2- 20lb Fire extinguisher manned by a dedicated person

MOTORCYCLES 1-10lb Fire extinguisher

Every pit must have a piece of rubber mat, fuel catch basin or some material to place under the fueling area of the race vehicle for fuel containment compliance. Rubber mats from Home Depot work well. Must have a barrier that won't leak fuel to ground.

Please DO NOT place fuel dump cans or gas cans directly on the ground. They must be either stowed in the back of the pit/chase truck or on the fuel containment material described above. This includes the gas stands for the MC - do not place them directly on the dirt. DO NOT leave any gas can in any parking lot or any pit, take out what you bring in! Please!

Penalties that could be assessed for Failure to follow these rules after you've been given a warning: 1st Offense ½ hour Penalty, 2nd Offense 1 Hour, 3rd Offense DNF, 4th Offense Disqualification.

More Information for Pit Crews:

Please ensure each pit/chase vehicle has their **pit pass** attached to front windshield. This helps the Security check passes and keeps the line moving.

Please ensure each pit/chase vehicle has **race vehicle numbers** easily identifiable on the front or back windshield/window. This helps the Pit Captain find your crew in the event contact is needed.

Please ensure all pit personnel have their **wristbands** on.

IMPORTANT RADIO FREQUENCY INFORMATION:

Rugged Radio Relay is now running **Radio Relay Service for Pit Crews** looking for race team information. Rugged Radio Relay is for STATUS QUESTIONS. Please note the frequency: **152.960**. Please direct all status questions to this frequency. Do not contact the BITD frequency for any race status.

Thank you and have a fun and safe race!
